MADGE MILLER.

Madge Miller, on a summer day, Walked, as usual, her pleasant way Her dress was tidy, her apron white Her face was sweet as the morning I She was a country village maid, Learning a country milliner's trade Her hands were soft, her dress was clean, And little she knew what care might mean She mid, " I'll work at my pretty trade, And live a happy and free old maid." "Lovers may come and lovers may go. I'll have none of them, no, no, no." The same old story by lovers told. Since first the earth out of chaos rolled (Let us kindly hope, who are old and wice They did not know they were telling lies "Marry me, durling, and you shall be The happiest woman on land or sea" "No longer then will you have to go To your daily labor through heat or roow Marry me, and you shall never know A sorrow or hardship a care or a woo! She heard the story of promised bliss, Bright and big was the honeymoon, But clouded by worldly care too soon

For housework led her its weary round -fler fast were tethered, her hands were bound. And children came with their small demands. Fettering closer her burdened hands. In her Andron's house she came to be, A servant in all but salary. All her days, whether foul or fair Hushing an ailing infant's screams, Lest it should break its father's dreams And wash the dishes and rub the knive-The lofty mission of duteous wives Or coaxed and doctored a subbing child By the pungs of ear-ache driven wild-Were seatons of wakeful, nervous dread so if at last o'er her aching head The angel of slamber chanced to stoop, He brought her visions of mump or even a And she rose unrested, and went once more Through the shift reating of the day before. Week by week did she drudge and toil, And shew and pickle, and roast and hold And worth and from and awrep and cook. Her only reading a recipe book; And bothe the children and brush their both And patch old garments, and darn and ment-She led her nity and sportive way The pretry charm of her girlideday For how can a playful funcy toxe, When since tied up to a cooking stars. Her face was old ere she reached her pri-Sometimes would her well-kept husband look to from the page of his paper or book, And note how the bloom had left her face thow gray had mixed with her looks of brown, And her forehead gained a growing from. And say: " She is ngly, I declare: I womler I ever thought her fair" Not vexing ker husband's days or nights By mention of woman's rights, Till she died at last—too severely trial— Her life's one selfish deed—she died:

well as you can.

STATISTICS OR INSANITY,-The great master of statistics, Quetelet, considers insanity under the universal point of view of the "Development of the Mora and Spiritual Faculties of Man; 7 yet tion to be made between the vicious perversion of the mind and beart and more ly physical disease of the brain Mara statistics have mostly to deal with the NO. 9. statistics have mostly to the moral and mental aspects of insanity and with the influence of pervorse habits in bringing on the bodily disease. It is hard to draw the line between the moral and physical factors of insanity, although there is a line of division between them ; and in some cases the disease is wholly physical, the result of inheritance, climate or acute sickness, and in other cases it springs from pride, sensuality, debauchery, and habitual vices, and has a previous history, a preparatory immorality, which ends in what is called "moral insanity."

The general opinion is that insanity is

on the increase in modern civilization and is multiplying that saddest form of death, the ruin of the intellect; but it is not easy to give positive facts to sustain that view. It is not just to base our estimate upon the increase of residents in instance hospitals, since the increase may only prove that better care is now taken of the insane, and the prejudice against those institutions has been dying away Yet wherever observations have been made, the increases in the number of the insune has been reported as so constant. and under all electrastances as in such regular proportion, that we can not belp believing that this evil grows among us decidedly as suicide. The proportion of the increase in the different kinds of lasanity, and the closer investigation of its distribution in city and country, as well as in the different civil and professional classes, leave no doubt that the necoliar ways and moral mischlets of our modern civilization favor the progress of this nalamity. Without being able to deslare the absolute correctness of the hours, we Europe (including idiate) the mealest relative number, two per thousand, to the most highly civilized nation, the Corman while the Roumanians held too middle ground, hearly one per thousand, and the clavic Tarters the lowest place, 11.0, or six-tenth- of one, per thousand. It is much the same with insanity as with sacide, more in the north and northwest of Europe than in the less civilized southern and southerstern parts. In all the more eighted countries, too, there is more toefease of insanity than of idnov ; and is the summ in office as compared with the country, for the stir and parties of overwrought vivil ration tend more to distract the brain lets mades - 1 h a

Among different cultings the pa sions that are called liberal are mass it clined to delusion and melancholy. While these constitute only about a awanteth of the whole population, or 1.04 per cent,, they number among the melanchisty 1.90, and among the delirious 14.79, per cent. Among the women of this class there are among the melancholy 12 00 per cent., and smong the delirious 9.41 per cent. In general, melancholy and mania prevail more among wemen idicey and delusion more among men.

In respect to civil condition, married, widows, and, above all, diverced persons, give a larger proportion of in-some than the married. Although children, who are little, if any, exposed to insanity, are reckoned in the percentage of the unmarried-sixty-two to sixty-four per cent .- yet throughout Germany the proportion of celibates among the insunais much more unfavorable-about seveniy per cent .- and in Bavaria as much as eighty-one per cent. Divorced woman are especially liable to delusion and mania Thus, while in Saxony the divorced constitute only 0.16 per cent, or sixteenand 0.30 per cent., or three-tenths of one Ah' of all the sad thoughts of women or men.

The sublest is this: "It needn't have been!"

—Partland T courage, and 3.04 per cent, thus in manta the proportion of divorced women rises as Times and Now - Nearly two hundred high as 6.02 per cent., and in the este-

prevention of this evil." A long time water, and occasionally moving them has elapsed and the remedy has not yet been found.
